

JW MARRIOTT®

Cares about our environment supporting:

ART FOR SOCIAL IMPACT

by

MISSION

We recycle plastic and transform it into art through a training process that employs youth at risk, thus achieving a social and environmental impact in Mexico.

VISION

We are a non profitable social business model, that generates a positive impact on society and the country through the recycling of plastic to turn it into art. Economic benefits are dedicated to supporting the communities in which it operates.

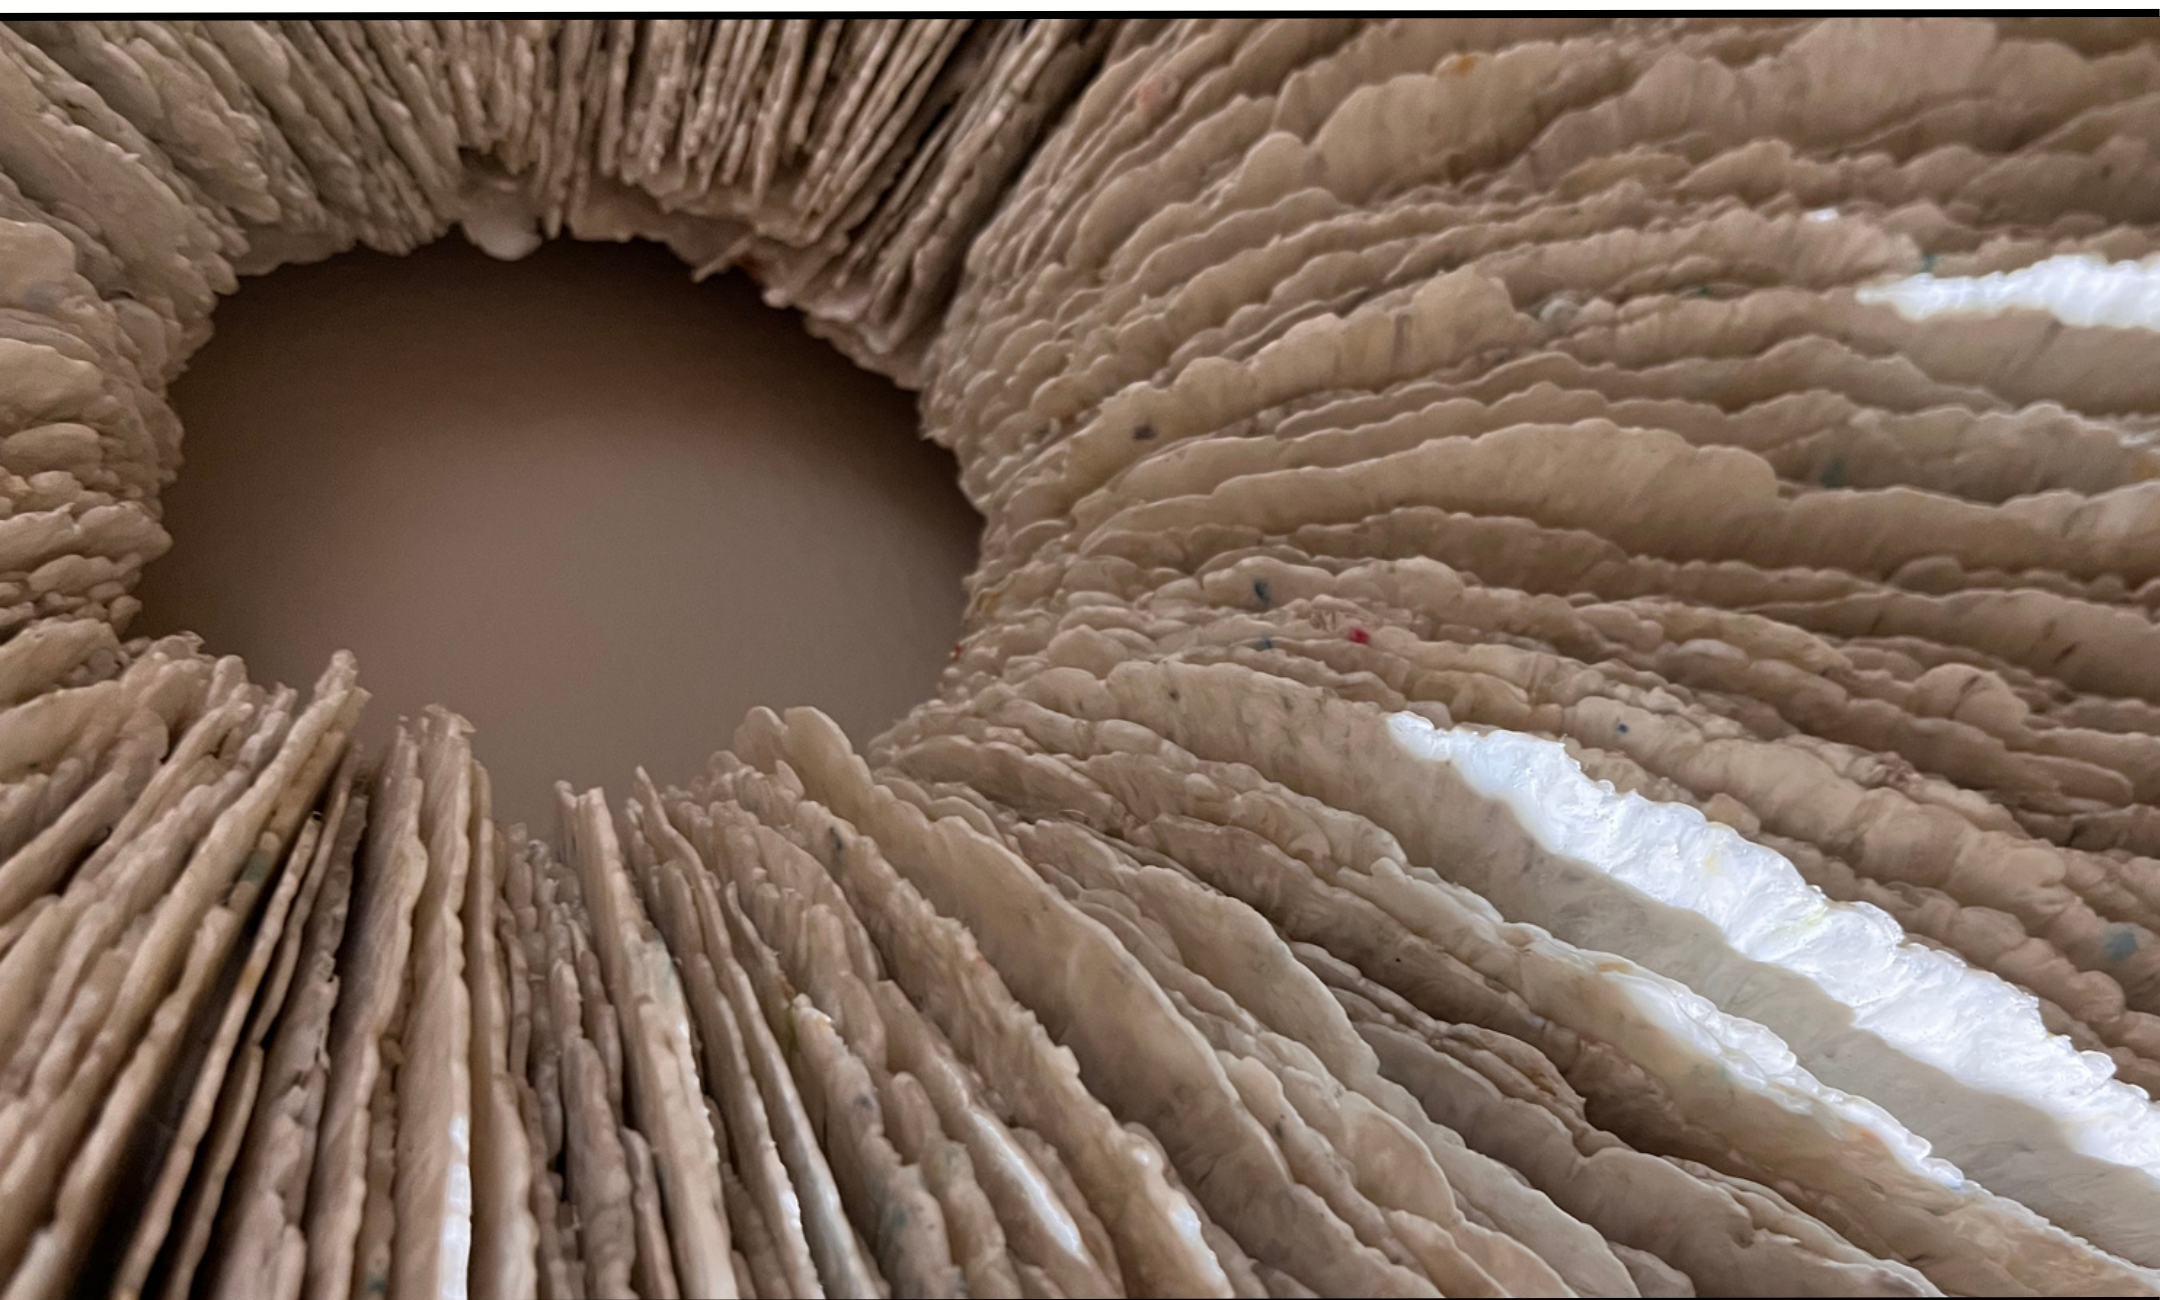

Environmental responsibility

Generate a reflection on the effects of plastic on the local ecosystem, as well as the possibility of recycling it and transforming it into a valuable product. Promote the circular economy and raise awareness about the importance of caring for our resources.

Seashell Assembly

Recovered and recycled polyethylene with thermofusion process.
By Tres Tierras Art Centre.

Flowers From the Sea

Recovered and recycled polyethylene with thermofusion process.
By Tres Tierras Art Centre.

By acquiring these pieces of art, **JW Marriott Cancun** promotes the growth of this social and environmental business in the community.
